Данное руководство не освобождает подрядчиков от их обязанности соблюдать правила кровельной промышленности и строительные нормы. Методы монтажа, представленные в данном руководстве, имеют характер общих указаний. Таким образом, разница в выборе подходящего метода может быть результатом разных типов кровли и метода монтажа в регионе. Монтаж кровельных листов требует профессиональных знаний, практики и специализации, поэтому опытные подрядчики могут применять индивидуальные решения, которые одобряет компания REGAMET.
